M12 BDDX - CK - 1 pc | Replaceable Chuck for M12 BDDX

- Possible to fix the chuck on the right handle attachment in order to have a right angle drill or directly on the tool.
- Ideal for all application in series that required pre-drilling (terrace fitting): 25mm screw driving bit can be let in the reception when the chuck is installed. Once the hole drilled, just pull the chuck out to drive the screw. No more need of 2 drills!.
- Allows user to keep a 25 mm screwdriving bit in the reception even when the chuck is fitted.
